+A

*Specific double density cuff design to guarantee the necessary adjustment for the impact in Running.

- 1 Place a sheet of paper on the floor and against the wall.
- 2 Place your foot on the sheet of paper, with your foot perpendicular to the wall and your heel against the wall.
- 3 Draw a line with a pen just in front of the thumb. Repeat the process on the other foot, using the longest section to determine the size.
- 4 Next, use a rule to measure the distance between the wall and the line you drew to find your size.
