BEGINNER

YOUR HEIGHT -10CM

This is intended to get you in the general vicinity of the correct size for you. Other factors such as weight, strength, and how aggressively you ski, as well as turn shape and speed (see below) will also play a role in size selection. Your local specialty retailer will ultimately be able to make the best size recommendation.

TURN TYPE

LONG TURNS

If you prefer to make longer, wider arcing turns, a longer ski will hold a bigger turn shape with more stability.

SHORT TURNS

If you prefer to make shorter, quicker turns, a shorter ski will be easier to maneuver.

YOUR SPEED

HIGHER SPEED

If you like to ski fast, a longer ski will give you more stability at higher speeds.

LOWER SPEED

If you ski slower, a shorter ski will be easier to initiate the turn and maneuver.
